Business Construction Services

Company Status PMDN

Financial Performance: Net income in 2011 increase to IDR 123.515 billion compare to IDR 80.629 billion booked in 2010.

Brief History: Our roots in Indonesian building and construction stretches back a quarter century to 1970 when we were first founded as PT Tjahja Rimba Kentjana. In our early years as a contractor and developer, we benefited from the exposure to a wide range of building projects that included both residential housing as well as commercial complexes. In the early 1980s we undertook a major restructuring that saw the creation of Total Bangun Persada, a company with a substantially strengthened capital base and a revitalised management team. Out of this was born a vision: to become a leading Indonesian building contractor through pride and excellence in construction. This vision has become a reality. Today, PT. Total Bangun Persada is Indonesia's premier building contractor. The realisation of this vision has been made possible through two major initiatives. The first of these is a clear focus only on building construction, with a sole emphasis on high rise projects such as office and commercial buildings, or developments like industrial projects and resorts. The second is our commitment to bringing an international standard of building construction and project management to the Indonesian building construction industry. As a result, our expertise in the construction of high rise projects is much sought after. Jakarta, today, is home to some of Asia's most unique and inspiring high-rise projects. Throughout this, Total has played a major role in providing building owners and project developers with superior service based on our commitment to excellence our strong customer orientation and our ability to complete projects on time, on budget and on specifications. As Indonesia continues to surge ahead on the path of national development, Total Bangun Persada intends to remain at the forefront of its chosen industry, establishing new standards of excellence in building construction, bringing the best practice and processes that are demanded by property developers, and supporting this with one of the industry's highest levels of professionalism and commitment.
