
How to Use this Directory

IDX at Glance

The merger of Surabaya Stock Exchange (SSX) into Jakarta Stock Exchange (JSX) to become Indonesia Stock Exchange (IDX) has been effective since November 30, 2007, and started to operate for the first time on December 3, 2007. Now, the Exchange facilitates the trading of equities, bonds, and derivatives. The presence of this single Bourse will hopefully improve the capital market efficiency, and increase the capital market growth in our country, either in the number of issuers or the number of local and foreign investors. In the future, IDX expects that capital market will become one of the main pillars of the Indonesia's national economic development.

Use this Directory

The first section of this directory provides the latest financial information on all companies listed on the Indonesia Stock Exchange (IDX). The companies are arranged by industries following by line of business. Within the same line of business the companies are placed in alphabetical order. Information on each company is provided in two pages. There are a total of 445 listed companies including 21 new companies as of the end of June 2012. This list of companies was also added though 4 companies were delisted by IDX, from July 2011 to the end of June 2012.

The second section provides a list of outstanding bonds and mutual funds on the Indonesia Stock Exchange.

The third section lists securities houses and brokers, underwriters, custodians, securities ad-

ministrations bureau, trustees, guarantors, public accountants, appraisal company, and legal advisors.

To facilitate the easy use of this directory, the content of information provided for each company is described in the following order.

Company Names, Business and Address

The company name is preceded by PT, which is Indonesian abbreviation for a limited liability company. In addition to the address of company's head office, location of factory is also provided whenever applicable. The company status refers to the Indonesian law which classifies companies into foreign joint venture (PMA) and wholly national owned (PMDN).

Company Activities and Financial Highlights

Financial Performance

The financial performance describes the most important financial highlights.

Brief History

For each company a paragraph describes the company's development and its main activities and products, among others its establishment, start-up of commercial operation, capacity of production, mergers, take-over, expansions, subsidiaries, branches, associations and agreements with other companies. In case of banks, foreign exchange status is mentioned, which refers to license to operate in foreign exchange transactions.

Shareholders after Listing

The present majority shareholders are listed together with the percentage of shares owned.

Summary of Financial Statements

The data provided in this section are derived from the respective company's financial statements. As required by the Otoritas Jasa Keuangan (Financial Services Authority) last name Bapepam (Securities Supervisory Agency), the balance sheets and income statements of a company and its subsidiaries are consolidated if that company owns more than 50% shares of a subsidiary.

The definition of the items under balance sheet and income statement generally conforms to common accounting principles and practices, therefore it does not need further explanation. Due to the nature of their activities, there is a variation of items and its classification in balance sheets and income statements. Components of equity are mentioned in balance sheets of all companies. In balance sheets of companies other than banks and other credit institutions, current assets and current liabilities are specified and its components with relatively large figures are mentioned, and depending on the availability of data the same treatment is applied to long-term liabilities. In balance sheets of banks, cash in hand and on banks and total deposits are divided into its components, and breakdown of borrowings is provided as far as data are available. In addition, for banks, other credit institutions and insurance companies breakdown of revenue and expense is provided.

Financial data for each company are provided for the past three years.

Financial Ratios

There is also variation in the financial ratios provided for banks, insurance companies and other companies. All ratios are computed in line with definitions commonly used for respective industry, some of which are self-explanatory such as

debt to equity to total assets. Others are also in conformity with commonly used ratios which for clarity are defined below.

PER	price earnings ratio or closing share price at the end of respective financial statement period divided by earning per share.
PBV	price book value or closing share price at the end of respective period divided by equity per share.
dividend pay out	dividend per share divided by earnings per share.
dividend yield	dividend per share divided by closing share price at the end of respective period.
ROI (Return on Investment)	profit after tax divided by total assets.
ROE (Return on Equity)	profit after tax divided by equity current ratio current assets divided by current liabilities.
Leverage ratio	total debt divided by total assets.
gross profit margin	gross profit divided by net sales
operating profit margin	operating profit divided by net sales
net profit margin	profit after tax divided by net sales
total asset turnover	net sales divided by end of period total assets
inventory turnover	cost of goods sold divided by end of period inventory
expense ratio	operating expense divided by premiums received
loss ratio	claim paid divided by premium received

solvency ratio	equity divided by net premiums (premiums after deduction of premiums for reinsurance)
cash and banks to total deposits	cash, Bank Indonesia and other banks divided by demand deposits

PER and PBV below the financial ratios are price earnings ratio and price book value ratio calculated by using the closing price at the end of June 2012.

The names of company's public accountants are provided.

Board of Commissioners and Board of Directors

This section lists the names of President and Member of Board of Commissioners, and the names of President and Member of Board of Directors. President Commissioner has supervisory role, and therefore has less power than the American type Chairman. But, President Director has more power than the President in an American type system. Number of company's employees is also given in this sub-section.

Listing History

Listing of shares are sequenced chronologically together with listing date, offering price and number of shares of the respective listing. First, second, and third issues means listing of shares originated from public offerings. Total shares listed refers to total listed shares multiplied by par value and is frequently less than or at most equal to the total issued and paid-up capital. The difference is the value of unlisted shares. In case one type of listing was undertaken on many dates within a month or year, only total listing of that type for the respective month or year is provided. The underwriters for company issue are also listed.

Stock Price, Frequency, Trading Days, Number and Value of Shares Traded Market Capitalization

Eighteen monthly data of stock price, number and value of shares traded, and market capitalization are provided for companies that listed their shares before the end of June 2012, except for 21 new listed companies.

Stock Price and Traded Chart

The chart of stock price and number of shares traded covers the period from January 2011 to the end of June 2012.
