Ito Warsito

Year 2011 marks a new chapter with new breakthroughs in capital markets for the Indonesia Stock Exchange (IDX). After surmounting challenges during the recovery period, IDX was not only able to maintain a good performance, but also strengthen its position in the regional and global markets. According to the data released by World Federation Exchanges (WFE), IDX is one of the Top 5 Performing Broad Market Indexes in the world, second in Asia Pacific, and ranked 3 in the world for its market capitalization growth in US Dollar. It shows that Indonesian Capital Markets play a significant role not only in regional markets, but also in global markets.

IDX showed a positive performance during the period of January-July 2011. JCI increased 11.54% from 3,703.512 at the end on 2010 to 4,130.800 at the end on July 2011. On August 1, 2011, JCI reached a new record level at 4,193.441. The stock market capitalization also increased 14.63% from Rp 3.247 trillion at the end of December 2010 to Rp 3,722 trillion at the end of July 2011. The average daily transaction value during January-July 2011 grew 21.42% to Rp 5.06 trillion from Rp 4.17 trillion over the same period last year.

Overcoming challenges in previous fluctuated years has given IDX the confidence to constantly synergizing to overcome existing challenges and to maintain our investors' trust in our markets ahead.

Indonesian Capital Market Directory (ICMD) has come to its 22nd edition this year. This directory provides information to investors to help them making decision related to their investments. I hope that ICMD can meet our investors' need for a reliable capital markets information source, which provides added-value for their investment decisions.
