

Preface from the CEO of Indonesia Stock Exchange for “Indonesian Capital Market Directory (ICMD)” 23rd Edition 2012

Ito Warsito

In recent years, Indonesian Capital Markets experiences significant growth. Year 2012 has been a particularly positive year for Indonesia Stock Exchange. The year was opened with an upgrade in the Indonesia’s investment grade, which became a momentum for the country’s national economic revival. International credit rating agencies, The Fitch Ratings and Moody’s, raised Indonesian sovereign debts rating from BB+/positive to BBB-with stable outlook by considering the increase of the Indonesia’s economic performance, strong external liquidity, and low public debt ratio with downward trend. Persistently, Indonesia’s economy remains resilience, thus making it as one of the few countries that successfully recorded a positive growth during the year 2012. On November 26, 2012, Jakarta Composite Index reached its highest level so far at 4,375 points. The stock market capitalization also increased from IDR3,537 trillion at the end of December 2011 to IDR4,072 trillion at end of November 2012.

All these achievements, strategic improvements, and development reflect our ability to excel and generate a better capital markets condition in Indonesia despite all the challenges we face. Experience in dealing with turbulent periods gained over the years grows our confidence to overcome existing challenges in synergy, as well as to maintain and retain the investors’ trust in the future.

The Indonesian Capital Market Directory (ICMD), which reached its edition this year, is a comprehensive reference guide for investors that provide essential information needed for investment. I believe that investors will find information on capital markets contained in this Directory thorough and provide added value in their investment decision-making.

Jakarta, December 2012
