Business Company Status	Chime Industry and Synthetic Fiber PMDN

Financial Performance: The Company has posted a sales turn over of US\$600 million as compared to US\$635 million in the previous year. Despite increased volume of production and sales, the total sales revenue declined due to drop in selling prices for all products triggered by sharp fall in PTA margins during the year. The company has therefore ended the year with an operating loss of US\$23.51 million as compared to US\$19.86 million for the previous year. However the Company was still able to post an EBITDA of US\$36.84 million for 2012 as compared to an EBITDA of US\$77.7 million for 2011.

The Company's performance was significantly impacted by the down turn in global economy during the year 2012, rising energy costs coupled with decline in polyester chain margins. Despite the dampening market conditions, the Company was able to maintain the operations of both of its plants to the near full capacity with high standards of efficiency.

Brief History: Asia Pacific Fibers, which was formerly known as Polysindo Eka Perkasa started its activities in 1984 as a manufacturer and marketer of polyester chips, fibres and filament yarns by setting up a filament yarn manufacturing plant at Semarang in Central Java, Indonesia. In the following years, continuous improvements were made in the company's infrastructure to increase productivity and with the improved product portfolio the demand for the company's products in the domestic and export markets continued to grow steadily.

In the 90's, the company initiated upstream plant expansions by setting up of a PTA manufacturing plant and a polyester fibre manufacturing plant at Karawang in West Java, Indonesia. By 1997, the company was firmly established as Indonesia's leading polyester manufacturer.

Since then, the company has added capacities, applied technologies, innovated processes and products, and has serviced markets across the globe. Today Asia Pacific Fibers' polyester manufacturing facilities stands at a capacity of 330,000 MT per year, thereby making it the largest polyester producer in Indonesia.

However, the journey continues. On the 2nd December 2009, in an attempt to improve all aspects of the company's performance a step further was taken to change the company's name from PT Polysindo Eka Perkasa Tbk to PT Asia Pacific Fibers Tbk. The new name is mainly designed to reflect the increasing market reach of the company throughout the world and is consistent with the improved prospects in terms of a strong recovery of market share and corporate performance in recent years.

Nowadays, Asia Pacific Fibers is at the forefront of the polyester industry; propelled by vertical integration, professional management, state-of-the-art machinery and consistent quality in manufacturing.

Asia Pacific Fibers' product portfolio includes petrochemicals like PTA (purified terephthalic acid), polyester chips, speciality polyester filament yarns and polyester fibres. With a host of speciality products for different applications, Asia Pacific Fibers caters to the ever changing demands in apparel, furnishings and industrial textiles.

Asia Pacific Fibers' product expertise and experience allows it to achieve market leadership in the industry and thus deliver superior value to the shareholders.

With a highly dedicated workforce and a strong commitment towards environmental protection, Asia Pacific Fibers has embarked on a path of excellence that will sustain its position in the world's polyester industry.
